# 1. Introduction

The Open Beds Report provides an outline of the average numbers of open inpatient beds and day beds/places in the acute hospital system on a monthly basis.

As set out in the Sláintecare Action Plan 2019, the Department of Health is committed to fostering the support of citizens and stakeholders in the Sláintecare reform process, consulting them about its delivery, and informing them about progress through engagement and open reporting. In line with this commitment to open reporting, the purpose of the Open Beds Report is to make information on capacity in the health care system available in a transparent and accessible manner. This report is published on the Department's website each month.

## 1.1 Data source and validation

The Health Service Executive (HSE) Acute Business Information Unit (Acute BIU) provide the bed data for this report, and the figures show the average number of beds or places open in each hospital for the month or year specified.

Data for 2019 are provisional and remain subject to validation by Acute BIU. The 2018 figures for Galway University Hospital are also awaiting validation. Tables are included in Appendix A.

## 1.2 Bed capacity context

The Health Service Capacity Review 2018 recommended an increase of 2,590 acute hospital beds across the system by 2031 to support the projected increase in demand for services in the years ahead. The National Development Plan provides for the full 2,590 beds by 2027.

The capacity programme for 2019 provided for the following increases in capacity:

- The provision of 75 acute beds and 70 community beds under Winter Plan 2018/19;
- 47 additional beds including 4 HDU beds in Cork University Hospital and 3 HDU beds in the Mater due to open by Q4 2019, and a 40-bed modular build in South Tipperary General Hospital due to be operational in Quarter 1 of 2020;
- commencement of works on a 60-bed modular ward in University Hospital Limerick which is due to be commissioned in Quarter 3 of 2020.

## 1.3 Definitions and clarifications

### 1.3.1 Inpatient beds

Average inpatient beds available is the number of funded beds occupied or ready and available for occupation each night of the reporting period. The cumulated figure is then divided by the number of days in the reporting period to provide a daily average.

### 1.3.2 Day beds/places

Day beds/places provide areas for day cases: patients admitted for a medical procedure or surgery in the morning and released before the evening. Average available day beds/places are beds/places which are currently occupied or ready for occupation.

### 1.3.3 Closed beds

The numbers provided in this report are average numbers of beds or places available daily in the specified period. Beds are not available when they are temporarily closed for reasons such as infection control, maintenance/refurbishment, or staffing shortages.

### 1.3.4 Hospital Groups

The current Hospital Group structure was established in 2013, with the Children's Hospital Group becoming Children's Health Ireland at the start of 2019. For the purposes of comparison and simplicity in navigating this report, hospitals are grouped as per the current Hospital Groups for all years. It should be noted that in the years from 2009–2013 these groupings did not have their current formal governance structures.

The seven Hospital Groups are Ireland East Hospital Group, Dublin Midlands Hospital Group, RCSI Hospitals Groups, Saolta University Healthcare Group, South/South West Hospital Group, University of Limerick Hospitals Group, and Children's Health Ireland.

## 2. Inpatient beds by year 2009 – 2019

There was an average of 10,958 inpatient beds open during 2019 from January to October.

A breakdown of the average available inpatient beds by Hospital Group for the years 2009-2019 is shown below.

### 3. Day beds/places by year 2009 – 2019

There was an average of 2,287 day beds/places open during 2019 from January to October.

A breakdown of the average available day beds/places by Hospital Group for the years 2009-2019 is shown below.

## 4. Inpatient and day beds/places by month for 2019

There were 10,983 inpatient beds and 2,326 day beds/places open in October 2019. A breakdown by month and Hospital Group is shown in the figures below.

## Appendix A. Available Beds Tables
