

Medical Devices Criticality Assessment Group
Thursday, 12th March 2020

Attendees: **HSE:** Fergal Collins (*chair*), Emma Benton, Dr. Michael Power, Sean Bresnan, Ger Flynn, Anne Louise Neenan, Prof. George Mellotte
HPRA: Nicola Hickie, Judith Martin
DoH: Colm O'Loughlin, Breifne O'Rourke, Mary Hyland,

Apologies: **HSE:** Martin Quinlivan, Fran Mollen, Sean Bresnan
HPRA: Niall MacAleenan

- HSE compiling list of dialysis units available.
- HSE is responsible for maintaining master list and accompanying Red-Amber-Green risk register dashboard, with advice from HSE CCO. The dashboard is a high-level summary, while the Master List offers more detail on individual items to assist procurement teams within HSE.
- HSE will oversee the ICU procurement data.
- It was noted that Ireland will need to participate in joint European measures, potentially facilitating requests from other Member States.
- HSE Estates to be kept informed in advance of any potential move to Stage 4 in the Critical Care Major Surge Framework which would potentially include modular builds.
- Testing will likely be ramped up in the coming weeks. At present there is a global shortage of swabs required for sample collection. HPRA and HSE to assess this risk.
- Next meeting to take place at **12:00pm, 16th March.**
