UTI / UROSEPSIS

To make informed clinical judgement

- Use clinical judgement and manage symptoms
- Consider rationalising medications
- Push oral fluids and consider S/C fluids or IV
- Review medications and withhold any medication that has a sedating effect in conjunction with GP if available
- Repeat MSU
- Treat any constipation
- Administer any appropriate analgesia

WATCH OUT for EARLY SIGNS of COVID 19

- Change in Resp Rate; Count for 60secs
- A need for supplemental O2 or increased need to sustain SPO2 %
- New confusion or increased confusion or mental status

If indicative See Deteriorating condition of person in Residential Care Facility algorithm
