Ireland's COVID-19 vaccination programme strategy is to distribute all available vaccine as quickly as is operationally possible, prioritising those who are most vulnerable to COVID-19.

The programme is based on the principles of safety, effectiveness and fairness, with the objective of reducing severe illness, hospitalisations and deaths from COVID-19 infection.

The following is an update on the total number of vaccines delivered to Ireland, up to and including Friday 19 March 2021.

<b>Period</b>	<b>Pfizer</b>	<b>Moderna</b>	<b>AstraZeneca</b>	<b>Total</b>
To end February	393,120	40,800	86,400	520,530
<b>March 2021</b>				
Week 9 2021	57,330		36,000	93,330
Week 10 2021	60,840		84,000	144,840
Week 11 2021	59,670	27,600	9,600	96,870
<b>Total</b>	<b>570,960</b>	<b>68,400</b>	<b>216,000</b>	<b>855,360</b>

As of Sunday 21 March, 680,015 doses of vaccine have been administered in Ireland.

Vaccination with [AstraZeneca was deferred](#) throughout most of Week 11.

Moderna Inc has requested that 50% of its vaccine is held back for second doses. Similarly, an appropriate buffer amount is built up and held back for all vaccines to ensure availability of second doses for the following week. Currently, about 95% of available vaccines are administered within seven days of arrival in Ireland.
